Profile

Currently studying in Manipal Institute Of Technology (3rd Year) in Information Technology and have been loving and developing mobile applications using Java native and using React native for iOS development.

Experience

Freelancer project's 2014
Did some freelancer projects based on HTML/CSS static website design and some android native java Projects.

Google Summer of code: 2016 March - 2016 September
Worked as a lead Android application developer for Zulip, Kandra Labs.
In which I redesigned their whole project, replaced all old deprecated libraries.
And now managing their repository and reviewing the current contribution going on.
